PROFILE

Full-stack developer and hackathon nut with a passion for mobile and web development.

EXPERIENCE

Software Engineering Intern, Simply Measured, June 2014 - September 2014

Built out template for bootstrapping internal tools with a node backend, angularjs frontend, complete with unit and e2e tests. Learned complete development-to-deployment pipeline, and helped build out internally developed open-source visual regression testing tool.

Student IT Technician, UW CSE, Seattle, WA – April 2013 - June 2014

Provide support and assistance for staff and students of the University of Washington Computer Science department. Help maintain the CSE website front end.

Camp Counselor, DawgBytes, Seattle, WA – June 2013 - August 2013

Taught middle and high school students how to create android apps and code for the Microsoft Gadgeteer platform using C#.

IT Technician, YWCA Portland, Portland, OR – October 2010 - July 2012

Co-supported and managed a network of about one hundred employees. Designed five-year office technology upgrade plan, which outlined what upgrades needed to be made in order to ensure good performance on an extremely limited budget.

EDUCATION

University of Washington, Seattle, WA – Computer Science Major,
Swedish Minor. Current GPA — 3.63, Graduating 2016
